

Economical ergonomics just got easier!

Introducing our new ML-Series Height-Adjustable table line.

At Mayline we understand empowering users to change posture from sit-to-stand throughout the day helps to promote a healthier and more efficient workforce. That's why we entered the height-adjustable market back in the early 1980s when we introduced our VariTask[®] product line, and that's why we continue to invest in this product offering today.

The ML-Series Height-Adjustable table line provides one of the most cost-effective sit-to-stand solution on the market today. Don't let a tight budget get in the way of your workers comfort and health.

ML-Series is offered in a 2-Stage base with 2 legs (as shown above); a 3-Stage base (shown on back) with 2 legs or 3 legs (not shown). ML-Series meets ADA and BIFMA performance standards, as well as Intertek VOC+ Certification.

ML-Series Height-Adjustable Tables

The 2-Stage bases are offered in a two leg model only; while the 3-Stage bases are offered in two or three leg options.
