To design your own sorter configuration

(different from preconfigured models listed in pages 310-311).

1. Assess the volume and size of your mail. Then determine the size and number of pockets you'll need, considering each pocket's height, shelf width and shelf depth.
2. Select an **EMPTY** sorter from pages 310-311 and configure it with the shelves sized from step 1. Try to use (but not exceed) the full interior space of each sorter. Specify shelf supports (one less than the number of columns of shelves) and shelves as shown on this page.
3. If you need assistance, contact space planning at spaceplanning@mayline.com.

SHELVES AND SHELF SUPPORTS

Shelf Supports

Shelf Supports divide a sorter into columns, and support the shelves within each column.

- Shelf supports are adjustable in 1" horizontal increments to fit various shelf widths.
- Each support is slotted at 1/2" vertical increments for shelf adjustment.
- Shelf support models are based on sorter type, height, and shelf depth.
- When ordering, remember that the two end shelf supports are included with each sorter.

CORNER PLATFORM

Supports 24" - wide sorter in a corner when used in L-shaped or U-shaped sorter layouts against a wall. The 32" square footprint provides better clearance at the sides of the sorter for more efficient sorting and retrieval. The TCNR Corner Platform is less expensive than the 30" x 30" TW30 Work Table, but installation is more complex.

When sorters will be in the open, or visible from the rear; or if the corner configuration will be used for a worksurface only, and not to support a sorter, we recommend specifying the TW30 Work Table instead.

The Corner Platform is supported by one leg in the rear corner, and by brackets attached to the tables on both sides. A filler panel is included (fills base-to-top gap in front between adjacent tables). Field installed.

Adjustable 1" increments, 24" - 36" H
