

## 4-Post Shelving

### 4-Post Shelving — Suit Your Shelf

**A versatile solution with a wide variety of sizes and components.**

4-Post Shelving is the most efficient, economical solution for storage and filing needs. It allows greater visibility and one-touch retrieval of end-tab filing. Yet it also accommodates box and archival storage as well as a variety of custom storage options. All shelving adjusts on 1 ½" increments along 4-Post uprights and are available in either 18- or 22-gauge steel. What's more, stationary 4-Post Shelving can be easily mobilized allowing users to expand their options.

Create the 4-Post Shelving solution that specifically addresses current and future high-density storage needs, or select from a variety of completed assemblies. 4-Post shelving stores virtually anything!

## 4-Post Shelving

The solution “4”  
whatever, however,  
whenever.

### 1. Choose hardworking and accommodating shelving options.

4-Post Shelving supports letter and legal filing. There are five shelf heights, five widths, and six depths to choose from. Each shelf comes with three adjustable dividers. Order shelves with or without slots.

### 2. Select the uprights needed.

Choose from either closed “L” uprights, closed “T” uprights, or open “T” uprights. “T” uprights are typically used for internal range support, while closed “L” uprights provide a more finished external appearance.

### 3. Start, add, and grow.

A complete starter section unit includes two uprights, the required number of shelves, center stops or back, common stops, shelf supports, shelf reinforcements as required, and one canopy top. Add adder sections as your storage and filing needs grow.

### 4. Explore several available options for creating tailor-made storage.

Choose optional zinc-plated wire shelving or add optional reference shelves. To increase versatility, optional rollout drawers are available in three heights. All 4-Post Shelving units are sold standard as open-back, however back panels are available. Select an optional slatwall along with a variety of accommodating accessories for even more efficiency.

## rugged

Weight capacity of 240 lbs. per shelf evenly distributed vertically and horizontally.

## efficient

Assembles with no hardware required. Great visibility and one-touch retrieval of end-tab filing.

## mobilized

To increase filing density, 4-Post Shelving can mount to the Kwik-Track mobile, M1000 or Mobile Lite systems creating either a bi-file or tri-file lateral sliding shelving system.

## rapid

Limited sizes in Pebble Gray are available on Safco's Quick Ship program.

## space planning

Safco® offers free, expert high-density storage design services. We recommend the best solutions for the needs and space, develop drawings for floor plans, and provide a list of all the materials needed to create an effective storage solution.
