

## Mobile 1000™ High Density Storage

### Mobile 1000 - High Density Storage That's Built to Move and Last

**More room, less space. Let's roll.**

A Mobile 1000™ high-density storage solution is something of an engineering marvel! It eliminates wasted aisle space and triples storage capacity of conventional filing cabinets. In fact, the system's mobile ranges can save up to 50% of valuable real estate. Simply roll mobile ranges along a track to access contents.

Mobile 1000 can be equipped with shelves, drawers, cabinets, and more options from Safco®. Best of all, Mobile 1000 is modular and reconfigurable making it easy to expand and relocate. It all adds up to better space efficiency, easier item location and retrieval, increased storage flexibility, and the ability to adapt to future expansion and reconfiguration needs.

## The possibilities are virtually endless

### 1. Choose hardworking and accommodating shelving options.

Select traditional steel, heavy-duty, or wire shelving to accommodate specific storage requirements.

### 2. Easy-to-move.

The three-spoke handle easily moves 10,000 pounds of shelving and media with just one pound of effort. Multiple ranges can be moved simultaneously increasing filing and retrieval time and efficiencies.

### 3. Easy to add on and relocate.

The unique groutless and modular track design features interlocking steel track complete with levelers. It can be installed around obstructions, atop raised floors, and on floors above ground level. The rear track flush-mount option positions the system close to walls, further optimizing the system's footprint.

### 4. Customize system for tailored efficiencies.

Rollout drawers are available in three heights and four widths, and mix and match drawer sizes to create limitless storage applications. Or make Mobile 1000 even more flexible with slatwall and specialized accessories.

Choose from our standard paint colors or enhance aesthetics with magnetic decorative enhancement for end and back panels.

### 5. Explore the other options available.

Select either the standard or incline ADA ramp entry option. To enhance security, adding floor locks or Security Shades are an option to consider.

## safe

A red safety occupancy indicator on the handle alerts users when an aisle is in use. A green indicator means the unit is safe to rotate handles and move ranges. Plus, Mobile 1000 features an in-track, anti-tip mechanism.

## sturdy

With all-steel construction, modular carriages support up to 8,000 pounds per carriage. Full height and width end panels are also steel.

## versatile

A wide variety of storage options provide secure environments. Typical applications can include storage for archival objects, criminal evidence and law enforcement equipment, medical and pharmaceutical supplies, athletic storage, library or bulk storage requirements.

## space planning

Safco® offers free, expert high-density storage design services. We recommend the best solutions, develop drawings for floor plans, and provide a list of all the materials needed to create an effective storage solution.
