

T-Mate™ Training Tables

T-Mate — Shared Values

A leg up on affordability.

It's simple math: fewer legs equals a lower price. That's the basic equation behind T-Mate™, tables designed with shared legs between adjacent surfaces to deliver excellent value. Having shared legs also allows for more knee space and creates a cleaner look.

Such efficiency doesn't come at the cost of flexibility, however. Creating a wide range of room configurations is still possible with T-Mate's three versatile top shapes of rectangle, transition, and pie.

RECTANGLE TABLE WITH PIE OPTIONS

T-Mate

The perfect meeting
and training room
companion.

1. Flexibility to configure as needed.

One-legged Adder Tables can be joined to two-legged Starter Tables in either direction. Any shared-leg configuration requires one Starter Table and all remaining tables can be Adder Tables. An optional ganging accessory securely connects tables.

2. Easy installation puts tables to immediate use.

Threaded metal-to-metal connectors attach 2" tubular steel legs to surfaces.

3. Choose from three durable top shapes.

Surface shapes include standard rectangle, transition, and pie options with standard factory grommet and electrical kit cutouts.

4. Add an optional steel modesty panel.

The panel features a generous trough for table-to-table cabling.

stylish

Choose from over 900 standard laminates from Nevamar®, Wilsonart®, Pionite®, and Formica® at no additional upcharge. Bases available in all Mayline standard paint colors.

powerful

A complete line of electrical accessories is available, allowing tables to daisy chain together, bringing power to the surface.
