

WALL ANTI-TIP, 4-POST

Components:

Bracket, Wall Anti Tip (2)

Hardware Kit (913045):

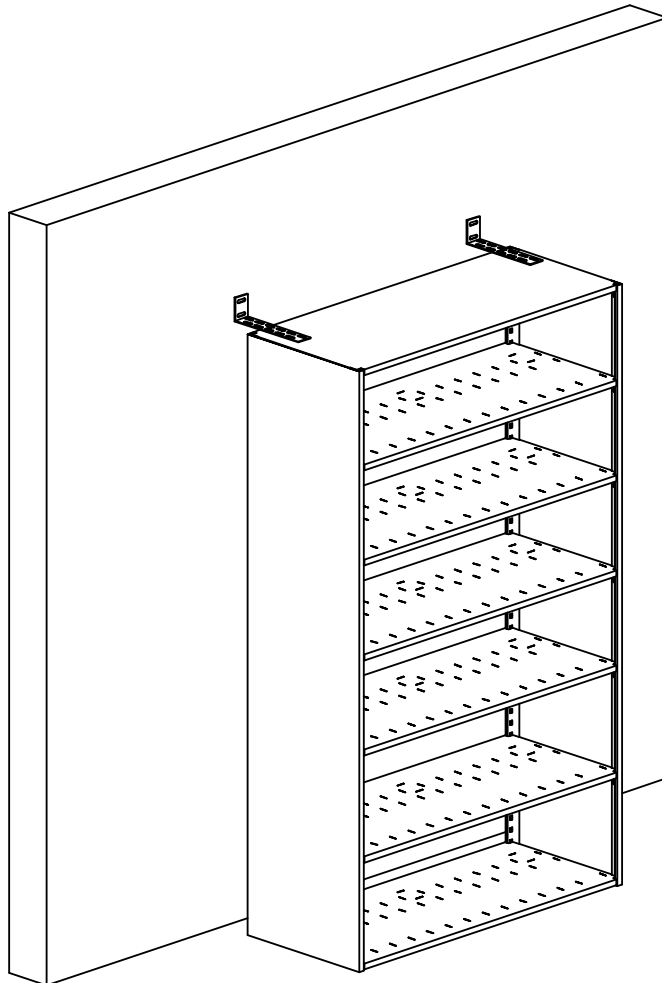

1/4-20 x 1-1/4" Philips Pan Head Screw (2)

1/4-20 Nut with Star Washer (2)

Tools Required:

- Drill
- 1/4" Drill Bit
- Phillips Screw Driver
- 7/16" Socket

**NOTE: INSTALLER TO PROVIDE HARDWARE TO
SECURE 'WALL ANTI TIP' TO THE WALL**

Wall Anchor Installation Notes:

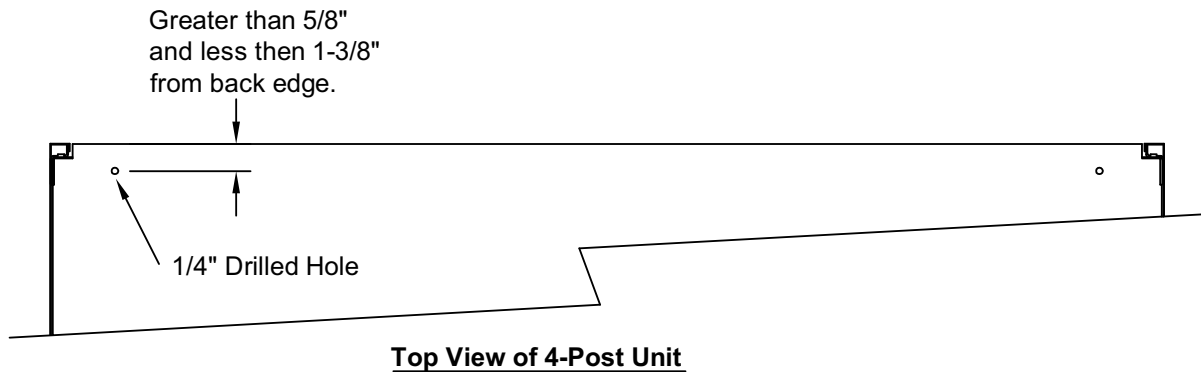

1. 4-Post unit must be no further than 8-1/2" from the wall
2. Installer is responsible for hardware to secure the Wall Anchor brackets to the wall. Only hardware for attaching brackets to 4-Post shelving has been included.
3. Wall Anchor brackets must be secured to a stud in the wall or to a concrete wall.
4. The Wall Anchor brackets must be secured to the 4-post unit through the top shelf support and the top shelf. Failure to do so will result in a failed installation.

'AWMK' Wall Anchor Kit quantity requirements:

Quantity of 'L' and 'T' Uprights require: 1 AWMK Mounting Kit required
5 - 8 uprights require: 2 AWMK Mounting Kits required
9 - 12 uprights require: 3 AWMK Mounting Kits required

Installation Procedure:

1. Identify the final position for the 4-Post unit. The 4-Post unit can be no greater than 8-1/2" from the wall. Once the position of the 4-Post unit has been determined, locate a minimum of two studs in the wall. Place a corresponding mark on the 4-post unit for proper alignment of the brackets.
2. Mark the proper location to drill a 1/4" hole through the top shelf and the shelf support. The hole location must be greater than 5/8" and less than 1-3/8" from the back edge of the shelf. This will ensure that the 1/4" hole will pass through the 4-Post shelf support.

3. Drill a 1/4" diameter hole at the locations that were just marked on the 4-Post unit. Use a clamp to secure the shelf and shelf support together during drilling.
4. Secure Wall Anchor bracket to 4-Post unit using the provided hardware. Tighten hardware by using a 7/16" socket and a Phillips screwdriver.
5. Secure Wall Anchor brackets to a stud in the wall. Installer is responsible for hardware to secure the Wall Anchor brackets to the wall. Only hardware for attaching brackets to 4-Post shelving has been included.
