BLACK LICORICE (BL) / GREEN APPLE (GS) /
BUBBLE GUM (PG) / BLUE (BU) / ORANGE (OR) /
BLACK VINYL (BV)

BALL CHAIR

Anti-burst exercise ball underneath a fabric cover to support movement that may help encourage better posture and balance. Encourages fidgeting, which may help to improve focus in children while also helping them move more. When the exercise ball is fully inflated, seat height is 17" and will lower when occupied.

STABLE LEGS

Unlike simply using an exercise ball, this chair will not roll away from under children, allowing for increased safety during movement. It is built on four sturdy legs to add stability and support active sitting.

POWDER COAT

A powder coat finish is added to each leg, adding even more durability to their steel base. It also helps to prevent against chipping to help maintain a new, polished look.

STATIONARY GLIDES

Each leg is fitted with stationary glides at the bottom to help protect floors from scratches. These glides also add further stability to the chair.
