

Veterans Administration Hospital in Salem, Virginia

Department: Medical and Hospital Supply

Issue: Limited storage space, no room for expansion, and issues with locating supplies

Previous Storage Solution: 4-foot, 4-tier rolling wire carts stored back-to-back with aisles in between rows

NEW Solution: Mobile 1000™ with 4-Post Wire Shelving

With this new Mobile 1000 system, the VA gained at least 60% more storage capacity and increased staff efficiency. Mayline's factory-certified installers made installation a breeze. This system also created a model for other VA facilities to follow...similar systems in VA hospitals have been installed throughout the Midwestern and Southeastern parts of the United States.

Product Features:

- Wire shelving provides improved airflow and open viewing between and through shelving ranges.
- All-steel, non-grouted track offers easier future expansion or equipment relocation options.
- All-steel end panels with color-coded Decorative Enhancements help staff identify where specific supplies are located.
- Easy to move mechanical assist drive system allows staff members to roll 10,000 lbs. back and forth with only 1 lb. of effort.
- Range safety lock with RED locking indicator alerts users when an aisle is in use.
- Incline ADA/cart ramp allows staff to pull supplies and restock inventory with ease.

AFTER: Increased Storage Capacity

AFTER: Time-Saving Design

BEFORE: Cumbersome Wire Carts

AFTER: Color-Coded Indexing
